Create your own one of a Kind SASHING
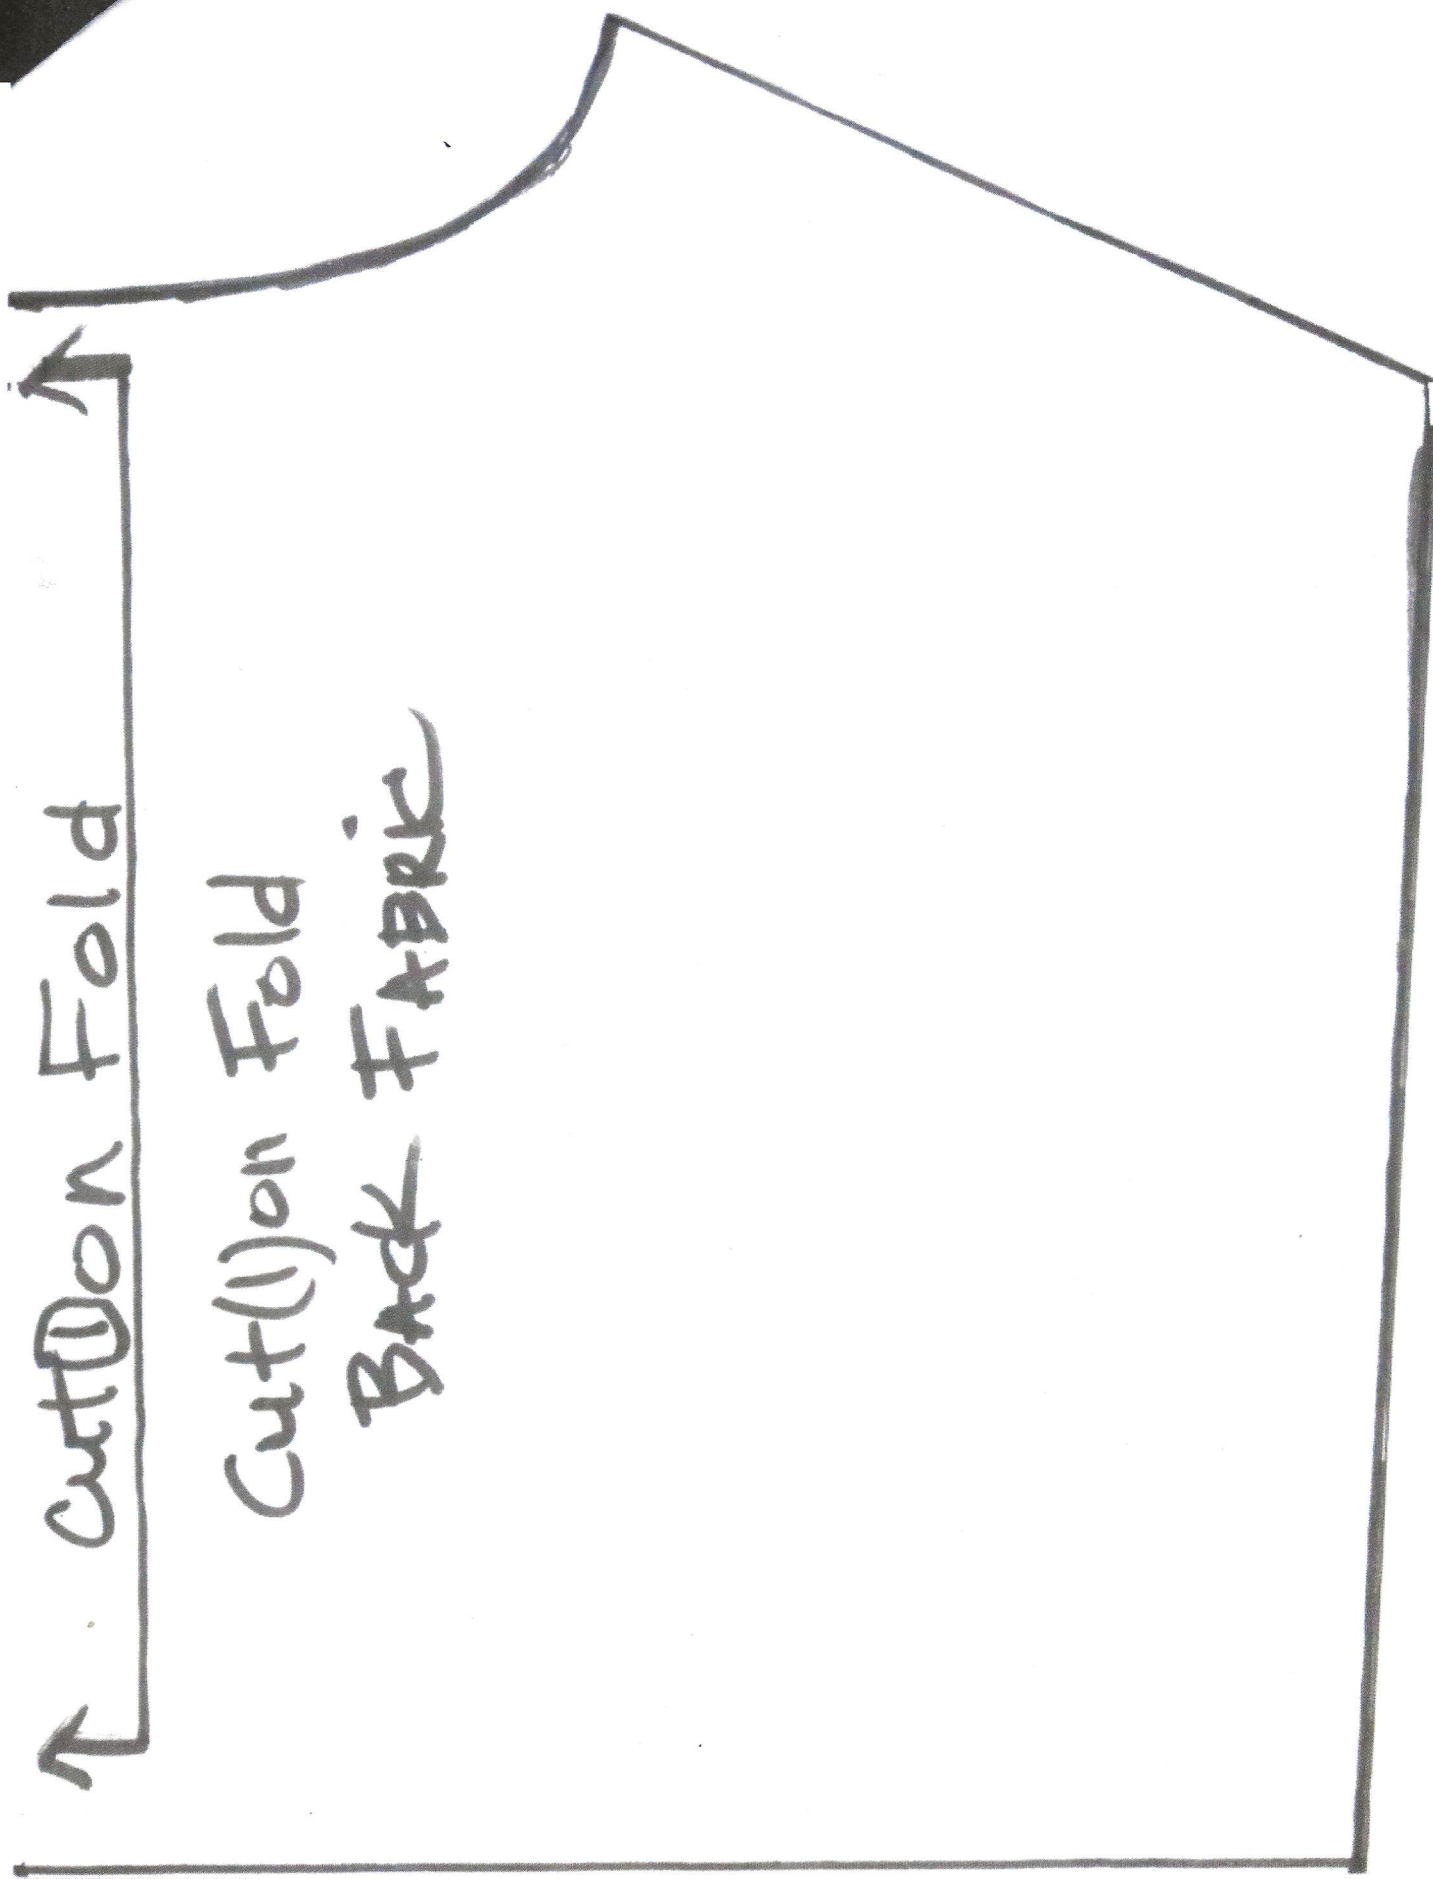

Create a one of a kind Sash

* One size fit all. Pattern Provided.

* Fabrics: I had a theme "Shades of Black Beauty", you can use all of your scraps. I cut mine 8" wide and a variety of length.

* Cut the sashing 1" - 1 ¼" X 8 "wide, in black or desired color. I find that Black makes the other colors POP.

* Join sashing to only one side of fabric, lay them in your desired order.

* Length: I measured from my shoulder to my knee. (40")

* This is a perfect time to add embroidery or any decorative designs or stitches.

* After joining them all together, fold in half lengthwise and trim to clean the edges both sides.

* Cut a lining or back fabric the same width and length as the fronts.

* Lay right sides of fabrics together, with the back together, use the pattern provided cut out the shoulder and front neckline. Do the same for the backing fabrics.

* Join right sides of front and back together at the shoulders, press seams open. Stitch @ ¼" seam allowance.

* Do the same for the backs fabrics matching at the shoulders pin and stitch @ ¼" seam allowance. Leave an opening to pull right side out.

* Designed by: Jacqueline Doctor Johnson

* Press ENJOY
